

# BeamBlok

BeamBlok is the safer way to stack, strap and transport your steel beams.

The advantages of BeamBlok over wood are,

- 1) Load is compact and tight.
- 2) Load will not shift when strapped correctly.
- 3) Fits 50mm and 75mm SHS and RHS
- 4) Lead in edges so no operator has to be near the loaded beams.
- 5) Light weight
- 6) Reusable
- 7) Recyclable
- 8) Will not mark painted beams like wood does.
- 9) 54 BeamBlok's in a box
